

In referance to NAB's petition 04-160...please be advised that I urge rejection of this petition. Last week when tornados hit southeatern Nebraska it would have been nice to be able to get up to date local weather reports. We currently get the weather channel on our XM radio and this service is very necessary. I PAY A FEE for my XM radio service and I do not think it is necessary that the government should step in and tell XM radio what they can and cannot provide in the way of PUBLIC SAFETY REPORTS for WEATHER or TRAFFIC. Thank you very much for your consideration of my comments. Best Personal Regards, Clifford W. Stockmyer.
